KEEPING BUSINESSES SWITCHED ON AND POWERED UP

Known for exceptional quality of service and reliability, we have built up an impressive reputation. Customer service is at the forefront of everything we do and has made us the company we are today. Since 1946, we have kept our client's premises bright and safe to work in.

Whether you need a one off project or an ongoing electrical maintenance provision, our team will deliver a well-managed service to keep your business fully operational 24/7.

YOU CAN COUNT ON US

ELECTRICAL REPAIRS AND MAINTENANCE

Whether you need a one off repair for business continuity or an ongoing maintenance programme, our team of qualified electrical engineers work around the clock to keep your business running smoothly, leaving you with peace of mind everything is taken care of.

BCS repair and maintenance service ensures your business:

- Complies with the very latest regulations and standards
- Provides a safe working environment
- Maintains energy and cost efficiencies
- Extends life expectancy of infrastructure and appliances

ELECTRICAL INSTALLATION AND PROJECT WORK

Delivering high standards of design, management and installation for new and refurbishment projects, our team ensure your requirements are delivered on time and within budget.

BCS installation and project work includes:

- Site visit and client consultation
- Specification and site drawings
- Project management with 3rd party liaison
- Full electrical installation and commission
- Testing, inspection and certification
- Handover operations and maintenance manuals

DATA NETWORK CABLING AND CONTAINMENT

BCS manage the installation and containment of your data and network cabling. This ensures that your electrical infrastructure is functional, safe and designed to complement your working environment.

BCS network cabling and containment service includes:

- Site visit and assessment
- Design and installation of cabling scheme
- Structured cabling solution to maximise performance and durability of voice and/or data

FIRE ALARM AND EMERGENCY LIGHTING INSTALLATION

BCS install and maintain fire detection and emergency lighting systems, ensuring that your staff and business premises are safe and protected. Ongoing testing of fire alarm equipment is key to their successful operation in the event of a fire and is a legal requirement.

BCS fire and emergency installation service includes:

- Site visit and client consultation
- Specification and site drawings
- Project management with 3rd party liaison
- Full electrical installation and commission
- Testing, inspection and certification
- Handover operations and maintenance manuals

FIRE ALARM AND EMERGENCY LIGHTING MAINTENANCE AND TESTING

BCS fire alarm and emergency lighting maintenance and testing includes:

- Site visit and client consultation
- Full electrical testing
- Ongoing 6 monthly programmed fire detection test
- Modification of existing fire alarm systems
- Certification
- Administering fire safety documentation

ELECTRICAL INSTALLATION CONDITION REPORTS (PERIODIC TESTING)

BCS provide commercial and industrial Electrical Installation Condition Reports (EICR) to highlight potential safety shortcomings, defects or deviations from the current electrical regulations BS7671.

A BCS Electrical Installation Condition Report includes:

- Site visit by a BCS qualified electrical engineer
- Visual inspection and electrical testing of infrastructure and accessories
- Programmed repeat visits every 5 years in line with current BS7671 regulations

MAKING HISTORY

WE'VE COME A LONG WAY SINCE 1946.

Before the advancement of WWII, Edwin Billington, Walter Carroll and John Skidmore were employed by one of Leeds biggest electrical contractors of that time. Returning home from the battlefield, they founded BCS Electrics Ltd on the 19th March 1946.

The company soon recruited Harry Furness, an old colleague to join the management team. BCS Electrics commitment to staff welfare started back in Harry's day when he regularly cycled from Leeds to Manchester to deliver wages.

In the post war downturn, construction came to a halt as Yorkshire, like many industrial cities struggled. To ensure staff were paid, rugby league fans John and Ted visited Bradford Northern (now the famous Bradford Bulls) every week to take payment for their work on the stadium from ticket sales on the turnstiles.

From humble beginnings in their premises on 44 The Calls, Leeds to the rise of the company through the decades they are still owned by the Furness family. Today, BCS are a team of 30 highly skilled engineers and project managers, some of whom have been with the company for the last 35 years.

LIGHTING THE WAY

Whilst some of our services are similar to other electrical engineers, it's how we deliver them that make us stand out; how we work and what our clients can expect from us on each and every project. Our values and systems run through everything we do. It is a code of conduct that has been with us since we started in 1946.

- Well managed systems used throughout, directed from client briefs, pricing, installation and maintenance programmes. You can expect the same high standards no matter what the size or scope of the job.
- All our work is pre-arranged with engineers fully briefed on every aspect of the job - we don't just turn up un-announced, we keep you informed and communicate throughout.
- We provide fully qualified electrical engineers, trained to the highest standards of health & safety and client care.
- We provide continuous improvement programmes, which shows in the length of service and the commitment we receive from our team.
- We only use good quality equipment and materials, purchased from local reputable wholesalers, providing peace of mind we only work with the best suppliers.
- As well as full project management, we guarantee, on completion of works a '100% tidy up policy' leaving you clean and tidy with minimal disruption.
- We always think about the bigger picture, from installing the best in energy saving products to free assessments and advice on reducing energy bills.

This is why people come back to BCS Electrics.

ON CALL

WHEN YOU NEED US THE MOST

24 HOUR CALL OUT SERVICE

A BCS engineer will respond and be on premise within two hours to make the installation safe and return operations to full power.
